# Carbohydrates and Glycaemic Index (GI)

## What are carbohydrates?
- Carbohydrates are found in a variety of food and drink, and provides the body with energy.
- Carbohydrates break down into glucose during digestion and increase blood glucose levels.
- Many foods containing carbohydrate also provide dietary fibre, vitamins and minerals.
- The amount and type of carbohydrate you eat will affect your blood glucose levels.

## Which foods contain carbohydrates?

### Healthy carbohydrate choices:
- Wholegrain bread, Crispbread
- Wholegrain breakfast cereal
- Grains such as Barley, Quinoa
- Pasta, Noodles
- Rice
- Wholegrain flour, Wholemeal flour
- Lentils, Legumes
- Starchy vegetables including Potato, Sweet Potato and Corn
- Fruit
- Milk, Yoghurt

### Less healthy carbohydrate choices:
- Biscuits
- Cakes, Pastry
- Sugar, Agave syrup, Rice malt syrup, Coconut sugar
- Jam, Honey, Maple syrup
- Chocolate, Confectionary
- Regular soft drink, Cordial
- Fruit juice
- Potato crisps, Corn chips
- Icecream, Custard

### Foods that contain little or no carbohydrate:
- Meat, Chicken, Fish, Tofu, Eggs, Cheese
- Oil, Avocado, Nuts
- Sugar free drinks, Artificial sweeteners
- Non-starch vegetables including: Lettuce, Tomato, Broccoli, Cauliflower, Zucchini, Eggplant, Bok choy, Okra, Carrots
Glycaemic Index

The Glycaemic Index (GI) is a measure of how quickly or slowly a carbohydrate food is digested and increases blood glucose levels.

**Lower and higher glycaemic index choices**

The following food amounts are guides for main meals and may be individualised by your Dietitian. Speak to your Dietitian about what is right for you.

#### Tips to lower the GI

- **Acidity will lower the GI of a meal.** Add vinegar or lemon juice to meals as a dressing.
- **Fibre, particularly soluble fibre, can lower GI.** Add psyllium husk to breakfast cereal; add salad vegetables to a sandwich; add lentils to soup; choose high-fibre wholegrain bread and cereal.
- **Cooking then cooling rice or potato.** Try in a rice or potato salad.
- **Eating protein as part of a meal can lower the GI.** Combine fish, lean meat, skinless chicken, egg or tofu with a lower GI carbohydrate food and plenty of low carbohydrate vegetables.

Refer to the Baker Institute’s ‘Plating it up: the portion guide’ fact sheet for more information.
Low GI choices in a healthy diet

Spread your intake of carbohydrate food and drinks at meals and snacks throughout the day. Some meal and snack examples are listed below. Lower GI choices are in bold font.

### Breakfast
- Untoasted muesli (1/2 cup) with reduced fat, no added sugar yoghurt (100g)
- Multigrain bread (2 slices) served with 1 boiled egg, tomato, mushrooms and spinach
- 1 cup cooked traditional rolled oats made with reduced fat milk and topped with ½ banana
- Kellogg’s Guardian (3/4 cup) with reduced fat milk
- Smoothie: reduced fat milk (200ml), berries (1/2 cup) and reduced fat yoghurt (100g)

### Lunch / Light meal
- Sandwich: Multigrain bread (2 slices), skinless chicken and plenty of salad vegetables
- Soup: Barley (1 cup cooked), tomato broth and plenty of low carbohydrate vegetables
- Wrap: Low GI wrap or wholemeal pita (1), canned three-bean mix (1/2 cup), spinach, cucumber, capsicum
- Warm Salad: Kidney beans (150g can), canned tuna and cooked frozen vegetables

### Dinner / Main meal
- Spaghetti (1 cup cooked) and lean meat bolognese sauce, with a side salad
- Grilled salmon with baked sweet potato (200g) and steamed green vegetables
- Skinless chicken and vegetable stirfry with soba noodles (1 cup cooked)
- Tofu and low starch vegetable curry served with basmati rice (1 cup cooked)

### Snacks
- Fruit: Apple (1 medium) or kiwi fruit (2 small) or banana (1 small or half large)
- Reduced fat no added sugar yoghurt (200g) or milk (250ml)
- Freedom Foods — Barley + Seven Seeds, Barley + Cranberry and Almond muesli bar (1 bar)
- Vita-Weat 9 Grain (2–4 biscuits) with 1–2 slices of reduced fat cheese
- The Happy Snack Company Roasted Fav-va Beans or Roasted Chick Peas (1 pack 25g)
